Reserved and Restricted Domain Names Policy for the TLD .koeln

I. Purpose of this document

The purpose of this document is to describe the various types of domain names in the TLD .koeln that may be reserved, meaning that they are unavailable for registration, or restricted meaning that they may be available for registration under certain conditions.

NetCologne has developed this policy with reference to applicable industry standards, and ICANN mandated requirements, and to meet our operational requirements for the TLD .koeln.

II. General information regarding this policy

The availability of domain names is at all times subject to our policy. Our policy documents can be found at the following link www.dotkoeln.de.

III. Our use of reserved and restricted labels

Subject always to ICANN mandated requirements; a reserved or restricted label may be allocated or registered to us.

IV. Reserved labels

The labels that are reserved in the TLD fall into the following reserved categories:

- Technical operations;
- Country and territory names;
- Names of intergovernmental organizations;
- Labels composed of two characters;
- Names of the International Olympic Committee, and those of the International Red Cross and Red Crescent Movement; and
- Labels reserved by NetCologne

a. Technical operations

The following label in the ASCII character set is reserved in all levels of the TLD:

- nic
- www
- iris
- whois

b. Country and territory names

The following label(s) in the ASCII character set and in the Internationalized Domain Name form are reserved in all levels of the TLD:

- The short form (in English) of all country and territory names (including the European Union) contained on the ISO 3166-1 list (http://www.iso.org/iso/country_codes).
- Country and territory names described in the United Nations publication "Technical reference manual for the standardization of geographical names, part three 'Names of Countries of the World'" (http://unstats.un.org/unsd/geoinfo/UNGEGN/docs/pubs/UNGEGN%20tech%20ref%20manual_m87_combined.pdf) as published by the Group of Experts on Geographical Names.
- The list of United Nation member states, in each of the official United Nations languages described in the United Nations publication "List of Country Names" (<http://unstats.un.org/unsd/geoinfo/ungegn/wg1.html>) as submitted by the Working Group on Country Names of the United Nations Group of Experts on Geographical Names to the United Nations Conference on the Standardization of Geographical Names.

c. Names of intergovernmental organizations

Names of intergovernmental organizations are reserved at the second level of the TLD.

These labels can be found at the following link: <http://www.icann.org/en/resources/registries/reserved>

d. One- and Two-character labels

Labels composed of one or two characters in the ASCII character set are reserved at the second level of the TLD .koeln

e. Names of the International Olympic Committee, and those of the International Red Cross and Red Crescent Movement

Names of the International Olympic Committee and those of the International Red Cross and Red Crescent Movement, in the ASCII character set and in the Internationalized Domain Name form, are reserved at the second

level of the TLD .koeln. These labels can be found at the following link <http://www.icann.org/en/resources/registries/reserved>.

f. Reserved by NetCologne

Other labels may be reserved by NetCologne for our exclusive use, at any level of the TLD in order to operate and to promote the TLD .koeln.

A list of labels reserved for the use of the registry is shown in Appendix A “Reserved Labels for Registry Operator”

V. Status of reserved labels in the Service

Unless otherwise allocated according to this policy, the response to a WHOIS query for a domain name containing a reserved label will be 'no matching objects found'. This does not imply that the queried domain name is available for registration.

VI. Restricted labels

NetCologne may identify certain labels that will be restricted in the TLD. These labels will be chosen:

- Due to laws which exist, or which may come into existence; or
- Due to ICANN requirements

a. Restricted Labels due to Law

At this time, no labels are explicitly forbidden under German law. Should any new laws be issued by German or European jurisdiction, NetCologne reserves the right to block labels to which the new laws apply.

Nevertheless, labels that are likely to provoke an infringement of § 130 dStGB (Sec 130 “Incitement to hatred” German criminal law code) will be restricted.

Section 130 dStGB makes it a crime to:

- Incite hatred against segments of the population or call for violent or arbitrary measures against them in a manner capable of disturbing the peace
- To insult, maliciously malign, or defame segments of the population in a manner capable of disturbing the peace
- Disseminate, publicly make accessible, produce, obtain, supply, stock, offer, announce, commend, undertake to import or export, or facilitate such use by another of written materials that assaults the human dignity of others by insulting, maliciously maligning or defaming segments of the population or a previously indicated group

- Approve of, deny or downplay an act committed under the rule of National Socialism in a manner capable of disturbing the peace

The list of restricted labels (the so called “Black List”) for the TLD .koeln as given by the City Council of Cologne is attached as Appendix B.

Should a conflict of interest could arise between a restricted label and an application received through the TMCH during the sunrise period, NetCologne will activate the label after informing the applicant in detail about the fact, that the use of this label on a TLD submitted to German law may be considerate as a criminal offense by German authorities.

b. Restricted Labels due to ICANN Requirements

In the context of the New gTLD Collision Occurrence Management NetCologne will block all second level labels in the TLD .koeln and thus prevent them from being resolved which are listed by ICANN under <http://www.icann.org/en/about/agreements/registries/koeln/koeln-apd-report-12nov13-en.htm> as long as ICANN and NetCologne have not entered into another agreement on dealing with the matter of name collision.

VII. Status of restricted labels in the service

Unless otherwise allocated according to this policy, the response to a WHOIS query for a domain name containing a reserved label will give no response.

VIII. Registering a domain name that includes a restricted label

NetCologne will consider requests to register a domain name that includes a restricted label. Requests to register such domain names must be approved by us prior to being registered.

In considering an applicant’s request NetCologne may require that the applicant provides additional information including the reasons for which he believes that he should be able to register the label, and the applicant’s intended use of the domain name.

NetCologne’s decision to grant or decline such requests will be at our absolute discretion, and we will not communicate the reason for making such determination.

IX. Amending the list of reserved or restricted labels

NetCologne may at its absolute discretion from time to time, subject always to applicable industry standards, and ICANN mandated requirements:

- Add to, delete from and generally amend or modify the list of labels which are reserved or restricted, and the level at which they are reserved or restricted;

- Allow a domain name containing a reserved or restricted label to be registered; or
- Delete a domain name containing a label which is reserved or restricted.

X. Definition and review

This document has been prepared and published to represent NetCologne's policy regarding the administrative and technical management of the TLD .koeln.

NetCologne may discontinue or amend any part or the whole of this policy from time to time at its absolute discretion.
